TECHNICAL SKILLS

Programming

- Python C++ Java C SQL

AI / ML & Data

- Machine Learning Deep Learning NLP
- LLMs TensorFlow PyTorch Power BI
- Scikit-learn Pandas

Core Concepts & Tools

- DSA OOP DBMS Git GitHub
- Google Colab GeoGebra

INTERESTS

- AI / ML Cybersecurity
- Data Analysis Photography
- Communication Drawing

PRASOON LAWANIA

B.TECH CSE UNDERGRADUATE | AI/ML & OPEN-SOURCE DEVELOPMENT

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on experience in AI/ML, NLP, and full-stack development. Contributing to practical AI workflows and open-source development at Vicharanashala Lab, IIT Ropar. Interested in building accessible, real-world technology through research, collaborative development, and continuous learning.

EDUCATION

B.Tech — Computer Science & Engineering

2024–2028

[Engineering College Bharatpur](#)

CGPA: 8.78

Class XII • Antariksha Academy Senior Secondary School

2023

78.6%

Class X • Holy Mother Public Secondary School

2021

93.0%

EXPERIENCE & OPEN SOURCE

AI, Machine Learning & Open-Source Development Intern

May 2026–Present

[Vicharanashala Lab](#) • IIT Ropar

- Contribute to AI/ML workflows and open-source codebases focused on educational and community impact.
- Apply Python, SQL, deep learning, and LLM-based approaches to explore practical automation and context-aware software solutions.
- Work on backend components, model-inference workflows, research, documentation, and collaborative implementation.
- Four case studies approved and merged as part of internship contributions.

Python Pet

Python conditionals

Pixel-Art Canvas

Nested loops and conditionals

Code-Invaders

Logic and reactive algorithms

Cyberpunk Neon Arcade

UI/UX theme

Contribution: [PyBe PR #111](#) • [Commit](#) / [Changes](#)

PROJECTS

AI-Driven Farmer Query Intelligence System

[View Project](#)

[Python](#) • [Scikit-learn](#) • [NLTK](#) • [Pandas](#) • [TF-IDF](#) • [ML](#) • [NLP](#) • [Google Colab](#)

- Designed an agricultural query engine for topics including weather, pests, and market distribution.
- Built NLP preprocessing and Multinomial Naive Bayes classification workflows.
- Implemented cosine-similarity retrieval to match historical, localized farming recommendations.

CSFAQ — Crowd-Sourced FAQ Platform

VINS Connect • Team CS49

[React](#) • [TypeScript](#) • [Node.js](#) • [Express.js](#) • [Firebase Firestore](#) • [JWT](#) • [Tailwind CSS](#)

- Co-created a peer-to-peer student response platform for the Vicharanashala internship grid.
- Implemented secure authentication and role-based access control (RBAC).
- Helped scale crowd-voted answers into a reusable institutional knowledge base.

CERTIFICATIONS & JOB SIMULATIONS

- Google:** Intro to AI; Maximize Productivity with AI Tools
- NVIDIA:** Fundamentals of Deep Learning
- JPMorgan Chase:** Software Engineering Job Simulation
- Deloitte Australia:** Data Analytics Job Simulation
- Tata:** Cybersecurity Job Simulation

LEADERSHIP & ACHIEVEMENTS

- Participated in a high-level hackathon focused on analyzing Aadhaar enrolment data.
- Cultural Event Organizer team member.
- SSM volunteer; completed a 3-day road-safety workshop with MoRTH, MoYAS, and CoERS, IIT Madras.
- Completed 6-day “Vision for Holistic Value-Based Education” training, AKGEC (June 2025).
